JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

experimental Dust is raised; and yet neither Party can ever be brought to yield; for they are both in the right, only they have been unlucky in giving the same Name to different mathematical Conceptions. Had they distinguished these Measures of centripetal Force as *Newton* has done, calling the one *Vis centripetæ Quantitatis acceleratrix*, the other *Quantitas motrix*; all Appearance of Contradiction had ceased, and their Propositions, which seem so contrary, had exactly tallied.

VI. *A Letter from Rich. Hassel Esq; F.R.S. to Peter Daval Esq; Secr. R. S. concerning a large Piece of a Lath being thrust into a Man's Eye, who recover'd of it.*

S I R,

Read Nov. 10. 1748. **I** THOUGHT the following Case so extraordinary as to be worth the Notice of the *Royal Society*. If you think so too, I beg you to communicate it.

On *Sunday* the 17th of *Jan.* 1747. *Henry Halfey*, of *South Mims*, Labourer, thrust a long Lath with great Violence into the great *Canthus* of the left Eye of *Edward Roberts* of the same Place Labourer, which broke off quite short; so that a Piece two Inches and near a half long, half an Inch wide, and above a quarter of an Inch thick, (*see TAB. I.*) remained in his Head, and was so deeply buried there, that it could scarce
be

be seen, or laid hold of. He rode with the Piece of Lath in him from *Kick's End*, where the thing was done, to *Barnet*, which is above a Mile, to the House of Mr. *Justinian Morfe*, a Surgeon there, who extracted it with Difficulty; it sticking so hard, that others had been baffled in attempting to extract it. *Roberts* continued dangerously ill a long time; but at last, by the Blessing of God, and the Care of Mr. *Morfe*, recover'd intirely, and has the Sight of the Eye, and the Use of the Muscles. But some time after he seem'd well, he told me, that, upon leaning down forward, he felt great Pains in his Head. The Piece is suppos'd to have pass'd behind the right Eye. I am,

S I R,

Lincolns-Inn, Nov. 10.
1748.

Your humble Servant,

Richard Haffel.

VII. *The Sun's Eclipse of July 14, 1748. observed at Marlborough House, with the twelve Foot refracting Telescope, fix'd as a Finder to the Tube of the great twelve Foot Reflector; by John Bevis M. D.*
